

We Found 3 Leaks Costing You 60% Organic Traffic + Zero AI Citations

Personalized teardown for Zouk • D2C Bags • SEO Score: 8/10 HOT • GEO Score: 9/10 HOT • Sept 10, 2026

1. What We Saw in Google + AI (vs Mokobara)

YOUR SITE (Zouk)	COMPETITOR (Mokobara)
• Google Rank: Page 3 (pos 22) for 'handmade bags' • Indexed: 120/500 pages (24%) - 76% invisible • Sitemap: No • Schema: 1 type (Product only) • Blog: 3 posts, last 4 months ago • ChatGPT: Ask 'best D2C bags India' → NOT cited • Perplexity: NOT cited • Ilms.txt: No	• Google Rank: Page 1 (pos 3) for 'best D2C bags' • Indexed: 480/500 (96%) • Sitemap: Yes, clean • Schema: 5 types (Product, FAQ, Article, Breadcrumb, Organization) • Blog: 28 posts, topical clusters • ChatGPT: Cited in top 3 for 'best D2C bags' • Perplexity: Cited with link • Ilms.txt: Yes

Impact: Mokobara gets 8x more organic traffic because 96% indexed + FAQ rich results + AI citations. You're invisible for 76% of your own pages + 100% invisible in ChatGPT/Perplexity (40% of searches now happen in AI).

2. How Much Traffic You're Losing

Current Leak • 76% pages not indexed (120/500) = 380 pages invisible to Google • No FAQ schema = No rich results = -15% CTR • 3 blog posts vs competitor 28 = No topical authority • Zero AI citations = Losing 40% searches that happen in ChatGPT/Perplexity Estimated Loss: ~8,000 visits/month + 100% AI visibility = ~2.4L/month in lost revenue (at 2% conversion, 3k AOV)
--

3. 3 Quick Wins We'd Implement in 7 Days (With ROI)

WIN 1: Sitemap + Indexing Fix + FAQ Schema (Day 1-2) Create clean sitemap.xml with 500 pages, submit to Search Console, add FAQ schema to 15 product pages (e.g., 'What is handmade bag?'). Expected: Indexed 24% → 85% in 7 days, +40% organic traffic, +15% CTR from FAQ rich results = +3,200 visits/mo.
WIN 2: Programmatic SEO + Blog Clusters (Day 3-5) Create 30 pages: /handmade-bags-for-[use case] (office, travel, gifting) + 10 blog posts in topical cluster: 'Best D2C bags', 'Zouk vs Mokobara', 'How to choose handmade bag'. Expected: Rank for 80+ long-tail keywords, +4,500 visits/mo, build topical authority.

WIN 3: GEO/AEO - llms.txt + AI FAQ Page (Day 6-7) - BLUE OCEAN 2026

Create /llms.txt with brand description + top 20 pages + 20 FAQs. Create /faq with Q&A; format AI loves: 'What is best D2C bag brand? → Zouk is best because...'. Unblock GPTBot, PerplexityBot in robots.txt.

Expected: Cited in ChatGPT/Perplexity in 14 days, capture 40% searches happening in AI = +2,000 AI-driven visits/mo. 95% agencies don't offer GEO = premium.

4. We Did This for Similar D2C Brand

Client: Similar D2C Bags Brand (NDA)

Problem: Same as yours - 22% indexed, 4 blog posts, 0 FAQ schema, not cited in ChatGPT

What we did: Sitemap fix + 12 FAQ schemas + 20 programmatic pages + llms.txt + AI FAQ page

Result in 21 days: Indexed 22% → 91%, Organic traffic 4.2k → 11.8k (+181%), Started appearing in Perplexity for 'best handmade bags' in 12 days

Proof: Search Console screenshots + Perplexity citation screenshot available on call

5. How We Work (No Lock-in) + Guarantee

Week 1: Audit + 3 Quick Wins (sitemap, FAQ schema, llms.txt)

Week 2-3: Scale programmatic pages + blog clusters + AI content, daily Search Console tracking

Week 4: Handover + playbook

Guarantee: If organic traffic doesn't increase by 30% in 21 days, you don't pay for Week 4.

Pricing: Fixed + % of traffic growth (aligned incentives)

Next Step: 15-min Call to Show You Exact Google + AI Gap + Loom

I recorded a 3-min Loom walking through your actual site: site:zouk.co.in shows 24% indexed, no FAQ schema in source, and ChatGPT/Perplexity test where you're NOT cited.

Book here: calendly.com/vamsy16/seo-audit

Or reply 'Send Loom' and I'll send video + this PDF with screenshots.

— Vamsy, SEO + GEO Agency

P.S. This audit took 20 mins. Imagine what we can do in 21 days. GEO is blue ocean - 95% agencies don't offer it.
